# 1 Overview

This document provides a general description of the OpenNSL release. It also describes the supported platforms, API additions or changes, resolved issues and any relevant open issues.

OpenNSL 3.0.0.4 release adds the following new features:

- Support for Dell S6000 Switch
- Support for Switch Abstraction Interface (SAI)

This release is based on SDK version 6.4.8.

For product documentation, please refer to the 'doc/html/index.html' file in the OpenNSL package.

## **2 Deliverables**

### **2.1 Date of Delivery**

OpenNSL version 3.0.0.4 is released on 2<sup>nd</sup> March 2016.

### **2.2 Distribution Method**

OpenNSL is distributed via Broadcom's DOCSAFE and Broadcom's GitHub forums.

### **2.3 Items included in this release**

Following are the items included in this release:

- OpenNSL library for supported platforms
- OpenNSL header files
- OpenNSL documentation
- OpenNSL example applications and supporting software.

### **2.4 Items Not Included in this release**

The following items are specifically not included in this delivery and will be considered for future releases:

- None

### 3 Platform Support

This release contains support for the following platforms:

Platform	Broadcom Switching Silicon
Interface Masters Niagara 2948-6XL switch	Trident-II (BCM56850_A1)
Broadcom reference platform (SVK)	Trident+ (BCM56842_A1) Trident-II (BCM56850_A1) Tomahawk (BCM56960_A0, BCM56960_B0)
Wedge Switch	Trident-II (BCM56850_A1)
Celestica Redstone-XP	Trident-II (BCM56850_A1)
Accton AS5712	Trident-II (BCM56854_A2)
Dell S6000	Trident-II (BCM56850_A1)

### 4 Testing

The following table lists the high level testing done on OpenNSL API's using the sample applications.

Sample Application	Test description
L2 firewall	Verified L2 entry addition and deletion by checking the traffic from/to a destination. This application is also tested by booting it in warm boot mode.
Routing	Created host and default routes and verified that traffic is routed as per the routes added. This application is also tested by booting it in warm boot mode.
Trunk	Added few ports to a trunk and verified that the traffic is distributed across the trunk members. This application is also tested by booting it in warm boot mode.
KNET	Created a Linux interface that maps to a front panel port with a specified IP and net mask and verified the configured parameters from the Linux shell.
BST	Verified display and clearing of basic BST counters.
sFlow	Verified configuration, display of sFlow sampling rate along with the sampling of packets to CPU at configured rate.
Warm Boot	Verified restarting of OpenNSL driver in

	Warm Boot mode and ensured that the L2, VLAN, Port and L3 state is retained without impacting data forwarding.
--	--

## 5 Issues resolved

ID	Description
----	-------------

## 6 Known Issues

ID	Description
FP-230782	QSFP ports on Accton AS5712 platform are not supported
FP-233309	Warmboot feature is not supported on Accton AS5712 and Dell S6000 platform
